

Research Experience for Undergraduates

The Georgia Institute of Technology, in partnership with Intel, invites rising college juniors to apply to participate in a research experience program focusing on the latest product security and privacy challenges. We seek students interested in research (although experience is not required) and welcome applicants from all majors but with a preference for students majoring in computer/electrical engineering and computer science.

The program is especially interested in qualified candidates who can contribute to the diversity and excellence of our academic community and STEM fields as a whole. Women and other historically underrepresented groups in STEM disciplines are strongly encouraged to apply.

- Students receive a **\$6,000 stipend and on-campus housing.**
- **Research/career mentorship by Georgia Tech and Intel experts practicing security & privacy research.**
- **Opportunity to learn more about security research at the academia and industry.**

PROGRAM DATES

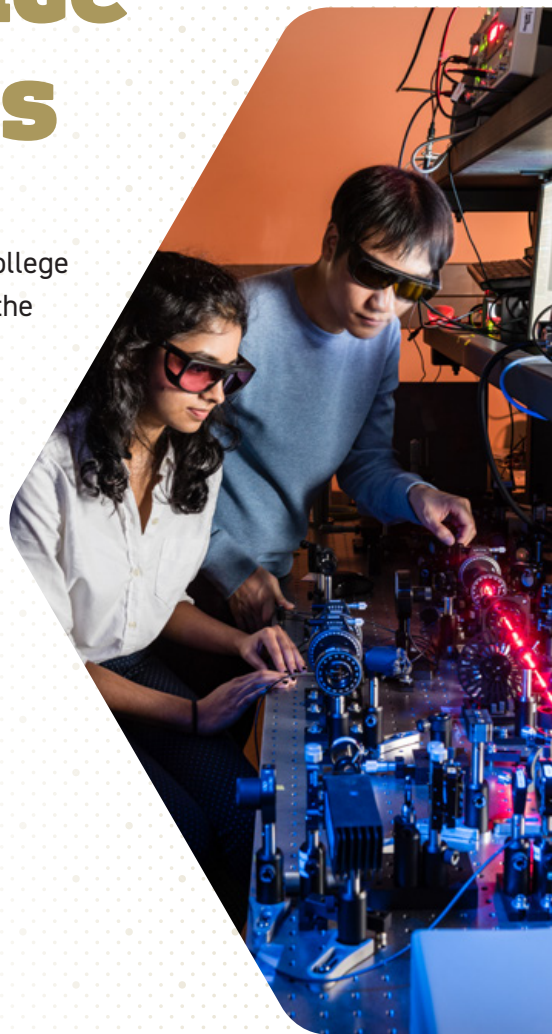

MAY 21 – JULY 28, 2023

APPLICATION DEADLINE

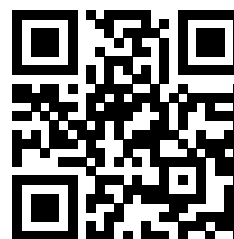

FEBRUARY 15, 2023

ELIGIBILITY

- U.S. citizens and permanent residents
- Rising juniors with good academic standing
- All STEM majors welcome; computer/electrical engineering and computer science majors preferred
